Respected Sir

Greetings from Agnishwar Jayaprakash, an Harvard Business School Alumni and Vice Chairman AGNI Foundation!

As you are aware that we have an unique initiative at AGNI College of Technology – 300 Startups. This promotes and drives innovative thinking and encourages Entrepreneurship spirit among students. This was launched during the Global Investor Meet 2019 and we signed an MoU with the Govt. of Tamilnadu.

We wish to extend this spirit among school children and in this regard we are collaborating with Industry leaders. We are connected well with the Industry leaders as most of them are mentoring our 300 startups.

We are planning to conduct workshops starting April 1st week onwards till end of May. The workshop will focus on training school children on the nuances and importance of innovative thinking, Industry issues and real life problems. This will be a big step for the Department of School Education, as children will be benefitted immensely.

We kindly request you that if you could pass this as a circular to invite all schools coming under your purview to participate in these workshops, it would be highly beneficial for the students.

We are extremely confident that students from different schools from across Tamilnadu can take advantage of this exclusive opportunity.

Looking forward for your support!

Thanks and Regards

Yours Sincerely

Agnishwar.Jayaprakash
